Floor tiles/accessories	74

Competence and individuality more than 25 years of van awning experience

Dear camping friends!

The Tent Technology brand was founded at the time to meet the high demands of campervan and caravan awnings

While many inexpensive suppliers also use simple materials, most Reimo Tent Technology awnings are made of high-quality Rib-stop polyester and are mostly manufactured in factories that are also known for their high quality production. Here too, Reimo's own development department, supported by real campers and product testers, ensures special solutions with great ideas!

Reimo has particular expertise in bus tents and rear tents for campervans. Some models have already been in production for 15 years and are constantly being improved.

This means for you: German design, high quality demands according to German standards and favourable as well as fair prices due to direct purchase ex works. The many years of further development of van awnings, motorhome awnings and caravan awnings gives you the security of receiving a mature product from the house of Reimo.

Also the latest development of tents - the air tents are produced and offered under the brand Tent Technology.

They offer a quick and easy setup and above all weight saving. And the air tubes as well as the sheathing are very durable and can withstand hard use without any problems.

High quality at fair prices

INTRODUCTION

MATERIAL

Most Reimo Tent Technology awnings are made of high-quality Ribstop polyester and are mostly manufactured in factories that are also known for their high quality production.

An additional coating provides the necessary UV protection, as well as all tents are flame retardant.

The waterproofness is at a water column of 2,000 to 3,000 mm.

SCOPE OF DELIVERY

All Tent Technology tents are supplied with pegs, guy ropes and poles/air tubes. Conveniently packed in a carry bag. All air tents come with a double air pump.

Additional delivery such as tent floor or clamping rod is mentioned separately with the respective article

Inflatable awnings are becoming more and more important. An inflatable tent is set up and ready for use in no time. The cumbersome handling with the tent poles is eliminated. Simply inflate with an air pump 7 psi pressure and the tent stands stable and reliable.

Then attach the awning to the roof rail or piping, stretch a few storm lines and anchor it storm-proof with the guy ropes and pegs.

The waterproof and tearproof materials are also convincing. Both hoses and sheathing withstand even hard use without any problems.

FASTENING TO THE VEHICLE

Vehicles with Multirail or rain gutter

The ideal attachment is by means of Multirail. You can decide here whether to fix the awning with a clamping pole/lock pole or with keder profile. The lock pole is pushed into the tunnel of the awning and then fixed to the Multirail or another suitable rain gutter with clamping clips. Keder profiles from 5.8 mm to 8 mm in diameter can be inserted into the Multirail.

The most practical solution is to attach the awning to the vehicle using a **double keder rail**. The keder rail as well as the keder profile allow the awning to remain standing when the vehicle is moved away.

Doppel-Kederschiene Art.-Nr. 90120

Retrofitting rain gutters

For attaching van awnings and sun canopies to vehicles without rain gutters, the Universal Kombi rain gutter provides protection against rainwater run-off and accommodates the piping of the awning or sun canopy in the piping profile.

Vehicles without rain gutter

Fastening of awnings by clamping pole/rail bar. In order to attach a clamping pole to the vehicle even without a rain gutter, folding suction cups are available. With 2 folding suction cups you can fix a clamping pole on the roof by clamping the pole into the folding suction cup. For the folding suction cup you need a clean, even and dry roof surface, the attachment is done without drilling.

Folding suction cup art. no. 93646

Magnet adapter art. no. 904490 p. 68

Fastening with loops or guy ropes

The folding suction cup is recommended for fastening awnings, canopies and awnings with sewn-on loops or guy lines without screws. For the folding suction cup you need a clean, even and dry roof surface. A very strong vacuum is created by flipping the lever.

Folding suction cup art. no. 936471

Fastening awnings with a magnetic adapter

The magnetic adapter offers an even faster way of attaching to the vehicle roof. It adheres to flat vehicle roofs and is connected to the awning with piping and connector profiles. Attention: A magnetic adapter does not hold on GRP high or sleeping roofs!

Camping Tent Know How

The tent skin:

Synthetic fibre or cotton?

For travel tents today, modern synthetic fibre fabrics have become almost exclusively accepted because of their excellent waterproofness and stability with low weight and pack size. Their disadvantage is the lower breathability (exception: acrylic fabrics) and the poorer light fastness, but this is of little importance for the usual use as a holiday tent. To increase the light fastness, the fabrics can be provided with a UV-protective coating.

Nylon-Taffeta (Polyamide) Extremely light and stable fabric. (Taffeta = English name for taffeta = fabric made of chemical threads). The quality is indicated in threads per square inch (190T=190 threads per square inch). 190T/70D additionally indicates the fibre thickness of 70D. (D = Denier, measure of the thread strength in man-made fibres). Nylon is very light (often only 78 g/m²). It is made even more waterproof by special coating.

Nylon PU-coated (polyurethane coating). Polyurethane coats the fibre and prevents water from penetrating the fabric. Polyamide with aluminium coating improves the reflection of sun rays. Depending on the coating, the water column ranges from 400 to 10,000 mm. Disadvantage: Nylon material contracts strongly in the sun. The durability against ultraviolet radiation (sun) is not very good. In rain or cold, the material stretches.

Nylon Ripstop Nylon fabric with woven-in reinforcements. More stable, much more tear resistant and more expensive. The stretching of the material during temperature changes is considerably less. It is wafer-thin and very stable.

Polyester UV resistant Extremely stable and hardly any wear. Long durability. Comparatively resistant to solar radiation. Low water absorption, moisture remains on the surface of the material and hardly penetrates the fibre. Very quick drying.

Polyester PU coated Even more water repellent and extremely quick drying.

Polyester with silicone coating Water beads up even more and does not penetrate the fabric at all

Polyester Ripstop Polyester fabric with reinforced "grid inserts", particularly tear-resistant Oxford polyester, e.g. 150D. Woven polyester fibres stronger and tear resistant. Used for extremely high quality tents. Reimo tents are mainly made of ripstop polyester or oxford polyester. For long durability at low weight

PE or polyethylene For tent floors or foul strips. Long, thin "plastic veins" are woven and laminated on both sides with liquid polyethylene. Abrasion and mildew resistant, UV insensitive.

PVC fabric Extremely heavy, waterproof and durable fabric, sometimes used for tent roofs or foul strips

Cotton Breathable, allows water and air to pass through. Moisture is absorbed, the individual fibres swell and the fabric becomes dense. Cotton usually only achieves an impermeability of about 300 mm water column. Because of its high weight, sensitivity and long drying time, it is now rarely used.

Polycotton Breathable blended fabric of polyester and cotton. Lighter and more water repellent than pure cotton. But considerably heavier and not as waterproof compared to polyester.

Acrylic Modern hi-tech synthetic fibre fabric with breathability similar to cotton tents. Only used in very high quality tents (e.g. series in Isabella tents).

Seam taping Synthetic fibre fabrics initially leak at the seams. To seal them, special high-quality PU sealing tape is pressed onto the inside of the seams of polyester tents under heat and pressure. This makes them completely water-repellent. If damaged, liquid seam sealant can be used to seal the seams. Seam sealing is not as critical for nylon tents (usually double-roof tents). They are sewn with polyester threads with a cotton coating that swells and seals. With cotton tents, the seam itself usually swells.

Flame ret ardantTent fabrics are naturally sensitive to fire. To improve their properties, they can be given a flame-retardant coating.

Condensation water tightness Modern fabrics are usually extremely waterproof. As a result, moisture from the breathing air or room air condenses on the inner walls. The only remedy is good ventilation. The following rule applies: the greater the temperature difference between the outside and inside, the more ventilation is required. The effect can also be reduced by using a thermal canopy made of cotton fabric, which can store moisture and thus has a balancing effect.

The tent poles:

Steel poles Very stable. In the simple version only painted, better rust protection is provided by galvanising. Important is a very good stiffening of the corner angle tent parts by rubber, cords or chains. Colour markings or numbering facilitate assembly.

Aluminium poles About 50% lighter than steel. For sufficient stability, they usually have to be dimensioned more strongly than steel poles. Stowage volume is about the same.

Fibreglass poles Used for modern dome or tunnel tents. Manufactured from fibres which are glued together with resin. Highly flexible, elastic and always returns to its original position. Poles of any length can be assembled from individual elements

Elastic rope connections facilitate assembly. Extremely durable, heavier than aluminium.

Aluminium poles for high tech tents Used for special high mountain tents. Mostly made of aircraft aluminium, high-strength and very light. Because of the high material costs, it is only worth using where particularly low weight or very high strength is required

Air tubes No more awkward handling of poles. The tent is set up quickly and easily by inflating the air tubes integrated in the tent skin.

Tent components:

Guy lines Should be a light color so they are visible in the dark. Lines with reflective stripes woven into them are ideal, as they reflect light in the dark like cat's eyes.

Zipper covers Hardly any zippers are waterproof. They should therefore be covered with a fabric flap which can be fixed with Velcro.

Tent windows Windows with mosquito netting provide good ventilation, but must be closed when it rains if the cover cannot be stretched over them for protection. Curtains over the windows protect the rolled-up cover from dirt and water. Curtains in front of the large clear windows protect their privacy. Choose between tents with tinted or clear windows.

Most tents are supplied with additional poles. These allow you to set up front or side doors as awnings.

Inflatable tents - the new generation of modern camping

The advantages of an inflatable tent -
pitching a tent has never been easier!

The tent can be set up or taken down with one person, although it is a spacious family tent or a tunnel tent. The inflatable awning is inflated and ready for use in no time; no fiddling with poles strictly according to regulations, no buckling of tent poles in storms. Simply take the air pump, or special electric pump, inflate 7 psi pressure and the tent stands stable and reliable for the coming days

Attach the freestanding awning to the roof rail or piping. Tighten a few more storm lines and anchor the tent securely with the guy ropes and pegs. The compact dimensions are also

practical, because without poles the camping luggage automatically becomes easier to handle.

Last but not least, the waterproof, tear-resistant materials make our tents a robust, reliable holiday companion. Should the unusual case of a leak occur in the pole air chambers, these are both easy to patch and replace

Both hoses and the sheathing provided can withstand hard use with ease

Quality is the sum of good details

SUN AWNING/SUN CANOPY FOR CARAVAN

Universal air awning Playa Air 300 & 400 Caravan

Mounting height:
235 - 250 cm

- Awning with air technology
- Quick assembly and disassembly
- Low weight
- Side walls removable by zipper
- Storm bracing with click lock
- Setup with only one air tube
- Connection with keder profile Ø 5+7 mm

Scope of delivery: awning, air tube, 2 side walls, air pump, pegs, storm guy ropes, carrying bag

Width 300 cm	906887	339,-
Width 400 cm	906888	379,-

Side panels easy to remove by zipper

Universal awning Playa 260 & 325 Caravan

Mounting height:
245 cm

- Universal awning in two widths
- With large side windows
- Quick assembly and disassembly
- Low weight
- Setup with only one fiberglass pole
- Connection with Ø 7 mm keder profile

Scope of delivery: sun sail, fiberglass and steel poles, pegs, guy ropes, carrying bag.

Width 260 cm	906881	159,-
Width 325 cm	906882	199,-

from 159,-

Palm Beach 2 - Sun awning and side wall for caravans and camping buses

- Robust awning with 240 cm depth
- Side walls optionally in two different widths
- Connection with 5 + 8 mm keder profile
- Including diagonal bars against "water bag" in the dome roof

① Palm Beach 2 2.6 - Width 260 cm

Chic and robust awning for your caravan, with sewn-on keder profile. Also suitable for VW Transporter with Multirail or similar keder rail. The two included erection poles as well as two diagonal fiberglass poles ensure a stable arching of the suncanopy upwards - against the formation of a water bag in the dome roof.

Scope of delivery: sun canopy, 2 erection poles, 2 diagonal poles, ground nails and guy ropes

900151 159,-

② Palm Beach 2 3.0 - Width 300 cm

The length of 3 meters is ideal for the VW Transporter with long wheelbase. With sewn-on keder profile suitable for vehicles with Multirail or similar keder rail. For vehicles with rain gutter we recommend our double keder rail as adapter to the keder profile, item no. 90120.

Scope of delivery: sun canopy, 3 upright poles, 2 diagonal poles, ground nails and guy ropes

900152 179,-

Matching side walls for Palm Beach 2 2.6 and 2 3.0.

The mesh window provides privacy with maximum air permeability and can be closed with a cover if required. The side wall is attached to the sun canopy with the top edge by Velcro and braced to the ground. Can be mounted on the left or right. Due to the width of the side wall, the bus sliding door can be opened unhindered.

Scope of delivery: side wall, ground pegs, guy ropes

③ Side wall for Palm Beach 2 2.6

Weight: approx. 2.2 kg.

Dimensions: W 225 x H 180 cm

900153 109,-

The classic for winter camping - CORTINA 3

**NEW
2023**

699,-

Mounting height:
235 - 255 cm

Winter awning Cortina 3 for caravans

- Frame with quick release
- Good insulation due to climate canopy
- 2 separate doors in the side walls
- Breathable side walls
- Winterproof roof
- The right choice for every season

The all-season awning CORTINA 3 is suitable for summer and winter. The walls are breathable, the sturdy roof is winterproof and the steel poles are robust. The awning is equipped with a large window in the front and windows in the side walls. Included are curtains in white for all windows and a hook-in climate canopy in gray for a homey ambiance and good insulation. The front wall can be opened in all directions with the 4-way zipper, completely removable or used as a porch function. Pressure poles and sewn-on foam beads ensure draught-free sealing to the caravan and are completed by the wind skirt.

Scope of delivery: tent skin, steel poles with Quick Lock padset, climate canopy, curtains, windbreak, wheel guard, storm guy ropes, pegs

Pulling aid for caravan & motorhome covers

Telescopic 71 - 120 cm, material: aluminum, with hook.

903075 9,95

Caravan canopy - for caravans up to 230 cm wide

- Reliable weather protection
- Caravan cover winterproof and breathable
- Partial cover for better ventilation: reduction of mould risk
- Made of high-strength 3-layer SFS fabric 160g/m²
- Waterproof and UV-resistant

A caravan cover is inexpensive to buy and offers reliable protection. It keeps the paintwork of your vehicle in good condition and prevents it from weathering - and your upholstery fabrics in the interior are also protected from fading by the caravan cover.

Mauritius - canopy & awning for small and large vehicles

- Awning with high variability
- Shade for large and small vehicles
- Vehicle attachment: loops for fastening with suction cups and 5 and 8 mm keder profile
- Eyelets at all corners

The pivoting side panels can be stretched down for additional protection.

Scope of delivery: sun sail, adjustable steel poles max. H 220 cm (2 pcs. for Mauritius M+L, 3 pcs. Mauritius XXL), 6 pegs, 6 guy ropes, packing bag

Shine - awning in 4 widths, with keder Ø5/8mm for awnings and Multirail

- UV resistant
- Reflective
- Depth 190 cm
- Easy assembly thanks to double piping Ø5/8mm

The sun sail made of UV-resistant reflective material has a double keder with Ø5+8 cm, so it can be used for common awnings, but also for campers with Multirail.

Delivery includes guy ropes in a practical carrying bag.

(Set-up poles must be ordered separately!)

Palm Beach 2 - Awning and side wall for campers

- Robust sun sail with 240 cm depth
- Side walls optional in two different widths
- Connection with Ø5 + 8 mm keder profile
- Including diagonal poles against "water bag" in the dome roof

① Palm Beach 2 2.6 - width 260 cm
Ideal for Volkswagen Transporter KR,
starting from year of manufacture 1996

Chic and robust sun sail for your caravan with stitched in keder profile suitable for VW Transporter with Multirail or similar keder rail. The two supplied upright poles as well as two diagonally running fiber-glass poles, ensure a stable arching of the suncanopy upwards - against the formation of a water bag in the dome roof.

Scope of delivery: sun canopy, 2 upright poles, 2 diagonal poles, ground nails and guy ropes
900151 159,-

② Palm Beach 2 3.0 - Width 300 cm
Ideal for VW T4/T5/T6 LR

The length of 3 meters is ideal for VW Transporter LR or T3. With sewn-on keder profile suitable for vehicles with Multirail or similar keder rail. For vehicles with rain gutter we recommend as an adapter to the keder profile our double keder rail, art. no. 90120.

Scope of delivery: sun canopy, 3 upright poles, 2 diagonal poles, ground pegs and guy ropes.
900152 179,-

Matching side walls for Palm Beach 2 2.6 and 2 3.0. 0

The mesh window provides privacy with maximum air permeability and can be closed with a cover if required. The side wall is attached to the sun canopy with the top edge by Velcro and braced to the ground. Can be mounted on the left or right.

Scope of delivery:
side wall, ground pegs, guy ropes

③ Due to the width of 2.25 m, the sliding bus door can be opened unhindered. **Weight:** approx. 2.2 kg.
Dimensions: W 225 x H 180 cm
900153 109,-

④ The height of 200 cm allows the side wall to be extended further. Weight approx. 2,5 kg.
Dimensions W 240 x H 200 cm

SUN SAIL FOR CAMPER

Awning Mauritius Premium - canopy & awning for small and large vehicles

- Sun sail with sewn-on side walls that can be tensioned or rolled up as desired
- Dome roof has 2 fiberglass diagonal poles to prevent water bagging
- High quality premium material
- Available in 2 designs: light grey/anthracite or completely anthracite

Chic and robust sun canopy made of heavy noble premium quality. The dome roof with 2 diagonal rods (fiberglass) scores with a pleasant standing height and prevents water sack formation in the rain.

The sewn-on side parts can be tensioned or rolled up as desired.

Scope of delivery: sun awning, 2 erection poles, 2 fiberglass diagonal poles, lock pole, pegs, guy ropes

**Rear sunroof**

for VW T5 / T6 / T6.1 with gullwing doors

- Robust weather protection
- Protection from sun, rain and drafts
- Easy and quick to install
- No bracing on the ground necessary

Rear awning is simply stretched over the open rear doors and serves both as sun - rain protection and protects against drafts when the doors are open. A telescopic tension rod between the doors defines the distance and holds the awning. The connection to the vehicle is made by means of a length-adjustable elastic belt and plastic hooks, the fixation with magnets. Easy and quick installation without modifications to the vehicle

Dimensions: approx. width 160 x depth 80 cm**Scope of delivery:** sun canopy, 1 tension rod (aluminum), packing bag

937983

119,-

- No poles required
- Low weight - only 2,4 kg
- Easy to set up
- Changing room at the bathing lake
- Shower tent at the rear
- For VW T5/T6 with tailgate

No poles, small pack size and easy set-up make the Instant rear tent the perfect choice for all van drivers.

The rear tent is sewn to the tailgate and is attached to the tailgate with snaps (still to be attached). This way the tent can easily remain stowed away in the tailgate

93790

149,90

Upgrade Dome Premium - rear tent

for VW T5 / T6 / T6.1 with wing doors

- Dome roof with window for generous feeling of space
- considerable space extension
- Doors can be closed when the tent is erected
- tub-shaped groundsheet protects against moisture and drafts
- Front with mosquito net
- Spacious and stable
- Australian standard

The highlight of the newly developed Upgrade Dome Premium rear tent: the gullwing doors can be closed when the tent is pitched. The dome roof gives a spacious feel while preventing water pock-
ets in the rain, and the U-shaped tubular steel frame promises stability. The front wall has a large door (can be used as a sun awning) and a transparent window with inner cover and additional mosquito net. The side walls with oval windows as well as the skylight window in the roof provide a good all-round view. A groundsheet with integrated wind protection under the bumper, which is fixed with Velcro, completes the tent.

Dimensions: W 250 cm x D 210 cm H 210 cm

Packing size: approx. 95 cm x 20 cm x 22 cm

Scope of delivery: tent, floor, steel frame, 2 fiber-glass poles, 2 steel pitching poles, guy ropes, pegs, packing bag

Rear tent Trapeze Premium for Renault Trafic

Also suitable for Citroën Spacetourer / Jumper, Campster, Peugeot Traveller / Expert, Toyota Proace (all from 2005), Ford Transit Custom, Fiat Talento, Nissan NV300, as well as Opel Vivaro / Vivaro C and Zafira Life - from autumn 2019

No poles, small pack size, light weight and easy set-up make the "TRAPEZ PREMIUM" the perfect rear tent. The new features such as mosquito netting in all zipper doors, skirt to bumper and sewn-in floor pan provide additional comfort. The front door has an additional mosquito net window and can also be set up as a sun awning. The two side entrances have tinted windows with cover. The best seller with protection from mosquitoes and insects has an additional ventilation above the entrance and can be attached to the side of the vehicle with clips. The sewn-in floor pan can be attached to the bumper with Velcro. The window in the roof can still be used as a skylight.

The large interior space is suitable for a camp bed, bicycles, as a dog area, etc. and can also be used as a changing room or shower tent.

The rear tent is simply pulled over the open tailgate and then attached to the vehicle and ground.

Scope of delivery:

rear tent, guy ropes, pegs, 2 pitching poles as well as packing bag

REAR TENTS FOR MERCEDES VITO

Update Vito Premium - rear tent with premium equipment

for Mercedes Vito, Marco Polo and V-Class from 2015 onwards

- Sewn in floor pan
- Mosquito nets in all doors
- Skylight
- Space for 1 camp bed

No poles, small pack size, light weight and easy setup make the Update Vito Premium the perfect rear tent. The new features such as mosquito netting in all zipper doors, skirt to bumper and sewn-in floor pan provide additional comfort. The front door has an additional mosquito net window and can also be set up as a sun awning. The two side entrances have tinted windows with cover. The best seller with protection from mosquitoes and insects has an additional ventilation above the entrance and can be attached to the side of the vehicle with clips. The sewn-in floor pan can be attached to the bumper with Velcro. The window in the roof can still be used as a skylight.

The large interior is suitable for a camp bed, bicycles, dog area, changing room, shower tent, etc. The rear tent is pulled over the open tailgate and attached to the vehicle and ground.

Scope of delivery: rear tent incl. pegs, guy line, pack sack, 2 pitching poles

RE-TENT the new collection of Reimo TentTechnology for the protection of our nature.

The tent fabrics are made from recycled disposable plastic bottles.

Each m² is roughly equivalent to 3 x 5-liter plastic Coke bottles
or 9 x 550-ml plastic water bottles

Mounting height:
180 - 200 cm

RE-TENT

Bus Awning Tour Easy

Fabric made from recycled disposable plastic bottles

- Roof inside with coating to reduce the temperature inside the tent
- Polyester fabric: Global Recycled Standard
- Sluice with doors on both sides

RE-TENT is the new collection of Reimo TentTechnology to protect our nature. The tent fabrics will be made from recycled disposable plastic bottles. For the TOUR EASY you need about 40m².

The tent retains all the features of the current TOUR EASY 4 (item 936550), but in addition to the recycled tent fabric in the roof, it receives a black inner coating to reduce the incidence of sunlight/light and therefore the temperature inside the tent.

MULTIRAIL RAIN GUTTER AND ROOF RACK ATTACHMENT

Multirail - rain gutter, sun sail and roof rack attachment in one

- Rain gutter for awning and roof rack
- Easy attachment of awning and awning with clamping rod or pull-in piping
- Easy mounting of the self-adhesive spoiler profiles
- The aluminum rail is already pre-drilled
- Absorption of roof loads up to 100 kg
- For keder thickness 7-8,5 mm

In conjunction with conventional roof rack, you can use it to transport bulky goods such as kayaks, bicycles or surfboards . It is also possible to mount the **Multirail** on vehicles with sleeping or pop-up roofs . Here the maximum roof load is 50 kg, approved by VW . The **Multirail** protects you from rainwater running off when the side windows and doors are open by means of the spoiler profile (please order separately). The Multirail is attached to the vehicle with a special adhesive (see below Sikaflex 554).

Sizes ideal for camping buses

Water protection tarpaulin

- Material: 100% PVC
- Dry awning during heavy rain

This practical groundsheet prevents water from entering the tent. 4 separately inflatable air hoses at the edges let the water simply flow past and the inside of the tent remains dry.

Water protection tarpaulin, color gray

Wide	Length	Weight	Gray	Price
2,5 m	2,5	3,1 kg	904467	44,95
